

Balance Kit SAUTER CW · CW KFB

Balance kit with build-type approval for individual assembly of floor scales – suitable for use in harsh industrial environments with humid environmental conditions

Features

With SAUTER scale kits, individual weighing solutions can be put together, for example, individual balance manufacturing in industry, automotive manufacturing and agriculture. In this way, a wide range requirements in terms of dimensions, materials, combinations of peripheral devices etc. can be fulfilled. Especially suitable for the manufacture of platform scales, weigh hoppers, silo scales, flush-mounted floor scales and other weighing devices. Area of use: Measuring mass as well as compressive force in harsh environments

- · Details for weighing cells:
- Accuracy in accordance with OIML R60 C3
- CE and RoHS compliant
- Protection against dust and water splashes
 IP67 (in accordance with EN 60529)
- Nickel-plated steel
- Nominal sensitivity: 3 mV/V
- 4-wire connection
- Junction box SAUTER CJ P4PG:
- The robust aluminium diecast housing
- 2 Protection against dust and water splashes IP65
- Note: Use the SAUTER CW in combination with one of our display devices, for example, KFS-TM, YKV, CE HS

Accessories

- Assembly of components, 50 kg 350 kg, KERN 965-412
- Assembly of components, 350 kg 1500 kg, KERN 965-413
- Assembly of components, 2900 kg 6000 kg, KERN 965-415

Note: Some weighing processes require an individual special solution. For this reason we have special scale kits available for you which you can use to create a tailor-made solution which is just right for you. In this way you can use the most varied platform sizes or individual weighing systems, e.g. within larger production plants, which match your requirements perfectly.

M

DAkkS

+3 DAYS

ISO

1 DAY

Adjusting program (CAL)

For quick setting of the instrument's accuracy. External adjusting weight required

Calibration block

Standard for adjusting or correcting the measuring

Peak hold function

Capturing a peak value within a measuring process

Scan mode

Continuous capture and display of measurements

Push and Pull

The measuring device can capture tension and compression forces

Length measurement

Captures the geometric dimensions of a test object or the movement during a test process

Focus function

Increases the measuring accuracy of a device within a defined measuring range

Internal memory

To save measurements in the device memory

Data interface RS-232

Bidirectional, for connection of printer and PC

Profibus

For transmitting data, e.g. between scales, measuring cells, controllers and peripheral devices over long distances. Suitable for safe, fast, fault-tolerant data transmission. Less susceptible to magnetic interference

Profinet

Enables efficient data exchange between de-centralised peripheral devices (balances, measuring cells, measuring instruments etc.) and a control unit (controller). Especially advantageous when exchanging complex measured values, device, diagnostic and process information. Savings potential through shorter commissioning times and device integration possible

Data interface USB

To connect the measuring instrument to a printer, PC or other peripheral devices

Bluetooth* data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

WIFI data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

Data interface infrared

To transfer data from the measuring instrument to a printer, PC or other peripheral devices

Control outputs

(optocoupler, digital I/O)
To connect relays, signal lamps, valves, etc.

Analogue interface

To connect a suitable peripheral device for analogue processing of the measurements

Analogue output

For output of an electrical signal depending on the load (e.g. voltage 0 V - 10 V or current 4 mA - 20 mA)

Statistics

Using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

PC Software

To transfer the measurement data from the device to a PC

Printer

A printer can be connected to the device to print out the measurement data

Network interface

For connecting the scale/ measuring instrument to an Ethernet network

KERN Communication Protocol (KCP)

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO record keeping

of measurement data with date, time and serial number. Only with SAUTER printers

Measuring units

Weighing units can be switched to e.g. non-metric. Please refer to website for more details

Measuring with tolerance range (limit-setting function)

Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

Protection against dust and water splashes IPxx

The type of protection is shown in the pictogram cf. DIN EN 60529:2000-09, IEC 60529:1989 +A1:1999+A2:2013

ZERO

Resets the display to "0"

Battery operation

Ready for battery operation. The battery type is specified for each device

Rechargeable battery pack

Rechargeable set

Plug-in power supply 230V/50Hz in standard

version for EU. On request GB, AUS or US version available

Integrated power supply unit

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or US on request

Motorised drive

The mechanical movement is carried out by a electric motor

Motorised drive

The mechanical movement is carried out by a synchronous motor (stepper)

Fast-Move

The total length of travel can be covered by a single lever movement
