

Industrial Platform Scale KERN IFB

High-resolution industrial scale in heavy version, now also up to [Max] 600 kg, verification optional

Features

- 11 Platform: weighing plate of stainless steel, painted steel base, silicone-coated aluminium load cell with protection against dust and water splashes IP65
- · Benchtop stand incl. wall mount for display device as standard
- · Protective working cover included with delivery

Technical data

- · Backlit LCD display, digit height 52 mm
- Weighing plate dimensions, stainless steel, W×D×H
- A 230×230×103 mm B 300×240×105 mm
- **©** 400×300×114 mm **D** 500×400×124 mm
- **■** 650×500×136 mm **■** 800×600×189 mm
- Dimensions of display device W×D×H 250×160×58 mm
- · Cable length of display device approx. 3 m
- · Permissible ambient temperature -10 °C/40 °C

Accessories

- Protective working cover over the display device, scope of delivery: 5 items, KERN KFB-A02S05
- 2 Stand to elevate display device, for models with weighing plate size
- A-E: Height of stand approx. 330 mm, KERN IFB-A01
- D-E: Height of stand approx. 600 mm, KERN IFB-A02
- A-E: Stand to elevate display device, height of stand approx. 1040 mm, KERN BFS-A07
- · Internal rechargeable battery pack, operating time up to 35 h without backlight, charging time approx. 12 h, must be ordered at purchase, KERN KFB-A01
- Bluetooth data interface for wireless data transfer to PC or tablets, must be ordered at purchase, not in combination with verification. When installing the Bluetooth data interface, the RS-232 data interface can no longer be used, KERN KFB-A03
- Analogue module, not possible in combination with signal lamp or rechargeable battery pack 0-10 V: KERN KFB-A04
 - 4-20 mA: KERN KFB-A05

Note: For devices that require verification (conformity assessment according to NAWI 2014/31/EU), please include the verification when placing your order. The initial verification is not possible after delivery. Please inform the full address of the location of use for the initial verification.

BALANCES & TEST SERVICE 2024

KERN Pictograms

Internal adjusting

Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)

Adjusting program CAL

For quick setting up of the balance's accuracy. External adjusting weight required

EasyTouch

Suitable for the connection, data transmission and control through PC or tablet

Memory

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

KERN Universal Port (KUP)

allows the connection of external KUP interface adapters, e.g. RS-232, RS-485, SB, Bluetooth, WIFI, Analogue, Ethernet etc. for the exchange of data and control commands, without installation effort

RS-232 Data interface

To connect the balance to a printer, PC or network

RS-485 Data interface

To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

USB Data interface

To connect the balance to a printer, PC or other peripherals

Bluetooth* Data interface

To transfer data from the balance to a printer, PC or other peripherals

WIFI Data interface

To transfer data from the balance to a printer, PC or other peripherals

Control outputs

(optocoupler, digital I/O) To connect relays, signal lamps, valves, etc.

Analogue interface

to connect a suitable peripheral device for analogue processing of the measurements

Interface for second balance

For direct connection of a second balance

Network interface

For connecting the scale to an Ethernet network

KERN Communication Protocol (KCP)

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO log intern

The balance displays weight, date and time, independent of a printer connection

GLP/ISO log Printer

With weight, date and time. Only with KERN printers.

Piece counting

Reference quantities selectable. Display can be switched from piece to weight

Recipe level A

The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out

Recipe level B

Internal memory for complete recipés with name and target value of the recipe ingredients. User guidance through display

Totalising level A

The weights of similar items can be added together and

the total can be printed out Percentage determination

Determining the deviation in % from the target value (100 %)

Weighing units Can be switched to e.g. nonmetric units. See

 \mathcal{Z}

balance model. Please refer to KERN's website for more details

Weighing with tolerance range (Checkweighing)

Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

Hold function

(Animal weighing program) When the weighing conditions are unstable, a stable weight is calculated as an average value

Protection against dust and water splashes IPxx

The type of protection is shown in the pictogram

Suspended weighing Load support with hook on the underside of the

balance

Battery operation

Ready for battery operation. The battery type is specified for each device

Rechargeable battery pack

Rechargeable set

Universal plug-in power supply

with universal input and optional input socket adapters for A) EU, CH, GB B) EU, CH, GB, US C) EU, CH, GB, US, AUS

Plug-in power supply 230V/50Hz in standard version for EU, CH.

On request GB, USA or AUS version available

Integrated power supply unit

Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

Weighing principle Strain gauges

Electrical resistor on an elastic deforming body

Weighing principle Tuning fork

A resonating body is electromagnetically excited, causing it to oscillate

Weighing principle Electromagnetic force compensation

Coil inside a permanent magnet. For the most accurate weighings

Weighing principle Single cell technology

Advanced version of the force compensation principle with the highest level of precision

Conformity Assessment

The time required for conformity assessment is specified in the pictogram

DAkkS calibration possible (DKD)

. The time required for DAkkS calibration is shown in days in the pictogram

Factory calibration (ISO)

The time required for Factory calibration is shown in days in the pictogram

Package shipment

The time required for internal shipping preparations is shown in days in the pictogram

Pallet shipment

The time required for internal shipping preparations is shown in days in the pictogram
